### **The Cited References Do Not Teach Obtaining An SRL Over A Network And Using The SRL To Download Files Over A Public Access Network.**

New claims 22, 30 and 39 recite features for a client to obtain a storage resource locator ("SRL"), over a network, from a virtual file system ("VFS"). As claimed, the

SRL comprises "information to access said storage center over said public access network and comprises an unique file identifier to uniquely identify a file stored at said storage center." The client uses the SRL to download a file from a storage center. The cited references, alone or in combination, do not suggest a network storage system, wherein a client obtains such an SRL over a network from a VFS, and the client uses the SRL to download files over a public network.

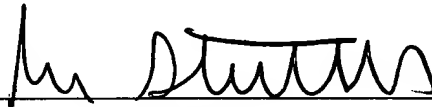

CONCLUSION

In view of the foregoing, it is submitted that the new claims are in condition for allowance. Reconsideration of the rejections and objections is requested. Allowance is earnestly solicited at the earliest possible date.

Respectfully submitted,

STATTLER JOHANSEN & ADELI LLP
